

SCALESOFT .NET

Your industrial weighing systems demand power to ensure accuracy and reliability. That power stems from our uniquely developed software, ScaleSoft .NET. Encompassing more than scale traffic monitoring, ScaleSoft .NET can track materials, sales orders, invoices, and more. Our software provides the flexibility to be used in any industry such as aggregate yards, coal mines, farming, recycling centers, waste transfer centers and more.

NTEP approved, ScaleSoft .NET Truck Management System Software is designed to be fast, flexible and easy to use. It allows for simple fill in the blank setup and configuration within a familiar Windows-based application environment.

Truck and Rail In/Out

Track products, trucks, rail cars and more through manual entry or RFID technology. ScaleSoft .NET is designed to be flexible to fit almost any weighing operation or process.

Data Entry

ScaleSoft .NET's intuitive and familiar Microsoft-style interface gives operators the ability to easily enter all setup information about drivers, trucks, haulers, customers and more.

Invoice Generation

Generate and send invoices to your customers daily, weekly, monthly or on any schedule you prefer. Invoices can then be sent to your QuickBooks desktop software for accounting purposes.

Reporting

Create new reports or customize the provided reports with the built-in drag and drop designer. Utilize over 20 built-in report variations as is or use them as templates to design your own custom reports.

SCALESOFT LITE

For basic ticketing and reporting needs on a single truck scale, we offer ScaleSoft Lite. If there's no need to take payments, manage multiple users or track inventory, ScaleSoft Lite is perfect for your weighing application.

ASP .NET ADD-ON

Allow authorized users on the network to access the ScaleSoft database. Edit data and generate reports through a web browser.

*Note: not intended for live scale weight readings

UNATTENDED ADD-ON

Unattended software integrates advanced DD Series indicators with ScaleSoft .NET and ScaleSoft Lite. It's highly configurable and will easily guide drivers through a series of prompts that can be customized down to the individual kiosk level for applications such as inbound and outbound traffic.

TECHNICAL SUPPORT

One year of technical support is included with the purchase of the ScaleSoft software. Technical support includes telephone and e-mail assistance with technical issues, problems that you might encounter, and general usage questions. Installation, on-site or remote training, software customizations and report customizations are not covered and will be quoted accordingly. One year of support begins after initial end customer training session. Training to be provided by authorized distributor or purchased from B-TEK Scales.
